Organic heather honey

fine tart, intense

In late summer, a wonderful natural spectacle occurs in the northern German heath landscape. Vast, delicate purple seas of flowers emerge and form a picturesque contrast to the dark green Douglas firs, red oaks and sand pines. The bees prepare a special honey full of character and noble tartness from the nectar of the small heather blossom bells of the broom heather (Calluna vulgaris).

Grape-growing region --- Colbitzer Heide (Northern Germany)

Harvest calendar --- mid-July to mid-September

Traditional medicinal properties --- Urinary stimulant

Tip --- Delicious on brown bread or Pumpernickel

Ingredients --- Heath honey * 100%.

* from organic cultivation
